

Developed in partnership with Lancer Worldwide, the Smartender GO provides all the benefits that the original Smartender Automated Cocktail Dispenser is known for in a portable package. This staffed portable cocktail cart provides cocktail dispensing with high consistency and full accountability to any location that has access to a standard US electrical outlet.

Features & Benefits

Fully self-contained unit with onboard water, water filter, waste, liquor supply, mixer supply, ice bin, Co2, and carbonator.

Accessory outlets within cart for point-of-sale station and printer.

On-Screen liquor low and empty notifications.

Adjustable mixer bay designed to hold the most common Coke and Pepsi Bag in Box sizes.

Patent pending pouring nozzle provides high quality product taste for all ingredients.

Advanced drink modifier recognition to interface with the most unique Point of Sale setups.

Remote machine management and reports via the Smartender Ops Service when online during use.

Simultaneous pouring of liquors and mixer result in an average pour time of 4 seconds per drink.

Accurate liquor pours to within 1/16th of an ounce.
